Languages

- Ukrainian (native)
- English (intermediate)

Hard skills

- | | | |
|--------------|------------------------------|-------------------------------|
| - HTML | - React native | - Material UI |
| - CSS | - Next | - OOP principles and patterns |
| - JavaScript | - REST API | - SASS |
| - TS | - Redux/toolkit, redux/thunk | - Git |
| - React | - Zustand | |

Soft skills

- | | |
|-------------------------|------------------------------|
| - Accurate | - Individually and in a team |
| - Hardworking | - Strong analytical thinking |
| - Quick learning skills | |

Summary

Frontend Developer with 2+ years of experience in team-based development and pet projects. I focus on building responsive and user-friendly interfaces using modern web technologies.

I have experience working with existing codebases, improving and extending functionality, and optimizing web application performance. I am comfortable turning designs into clean, reusable components and integrating them into scalable frontend architecture.

I learn new technologies quickly and pay attention to code quality, maintainability, and performance. I enjoy solving real-world problems in team environments and continuously improving my development skills through practice.

Project experience

Marketplace

<https://yevhenii-sulim.github.io/marketplace/>

Worked primarily as the main frontend developer on a web application, being responsible for most of the UI implementation across the project. Built new pages and reusable components, ensuring consistency and maintainability of the interface. Focused on optimizing performance, improving code structure, and refining existing functionality to enhance user experience and application stability.

Team challenge

<https://teamchallenge.io/>

Contributed to the development and improvement of a web application by building new components and features, as well as extending and refining existing ones. Worked with an established codebase, quickly understanding its structure to implement enhancements and fix issues efficiently. Focused on code optimization, maintainability, and improving overall performance.

SaveMeUp

<https://play.google.com/store/apps/details?id=com.savemeup>

Developed a mobile application using React Native as part of a team. I was responsible for the frontend, including navigation, screens, and reusable components. Integrated native functionality in Kotlin with the help of ChatGPT and connected it with the JavaScript layer. Managed state with Zustand and optimized app performance.

Inkluvo Mobile App

<https://github.com/yevhenii-sulim/inkluvo>

Built the frontend of a mobile accessibility map application with React Native, TypeScript, and Mapbox. Implemented interactive map markers, place selection, place details screens, accessibility forms, comments, photo upload flow, user location handling, and persistent user state using Zustand and AsyncStorage.

Education

Master of engineering

Kharkiv National University of Construction and Architecture, faculty of Sanitary Engineering, specialty - heat and gas supply and ventilation

2008 - 2013

Courses

UDEMY (react native)

Frontend developer (2025)

IT School GoIT

Fullstack developer (2023 - 2024)
